

## Test Plan for Abhibus Website

### 1. Test Plan Identifier

**File Name:** 1.0\_Abhibus\_Acc\_v1.0.doc

- Document Name: Test Plan -Abhibus Application
- Version: Abhi\_B\_1.0
- Date: 2-July-2026
- **Location:** Coforge Ltd, Greater Noida

### 2. Document History

| REV | Author                                       | Edits         | Date       |
|-----|----------------------------------------------|---------------|------------|
| 1.0 | Neeraj Singh<br>Graduate Engineer<br>Trainee | Initial Draft | 02/07/2026 |
|     |                                              |               |            |
|     |                                              |               |            |

### **3. Introduction**

**AbhiBus is an online bus ticket booking platform that enables users to search, compare, and book bus tickets conveniently from anywhere at any time. The application allows users to register, log in securely, search buses between different locations, select seats, choose boarding and dropping points, make online payments, and receive instant ticket confirmations. It also provides features such as booking history, ticket cancellation, refund tracking, live bus tracking, and profile management.**

### **4. Test Items**

**The following modules/components of the AbhiBus Online Bus Booking System will be tested:**

- **User Registration Module**
- **User Login Module**
- **Home Dashboard Module**
- **Bus Search Module**
- **Bus Listing Module**
- **Bus Filter & Sort Module**
- **Bus Details Module**
- **Seat Selection Module**
- **Boarding & Dropping Point Module**
- **Ticket Cancellation Module**
- **Refund Management Module**
- **Live Bus Tracking Module**
- **Logout Module**

## 5. Features to be Tested

| Feature to be Tested      | Priority | Comments                                                                  |
|---------------------------|----------|---------------------------------------------------------------------------|
| User Registration         | High     | Validate new user registration process.                                   |
| User Login                | High     | Verify secure login with valid and invalid credentials.                   |
| Bus Search                | High     | Validate searching buses between source and destination.                  |
| Bus Filter & Sort         | Medium   | Verify filtering by bus type, departure time, price, and operator.        |
| Seat Selection            | High     | Ensure users can select available seats correctly.                        |
| Passenger Details         | High     | Validate passenger information and mandatory fields.                      |
| Boarding & Dropping Point | High     | Verify correct selection of boarding and dropping locations.              |
| Payment Module            | High     | Validate successful and failed payment transactions.                      |
| Ticket Confirmation       | High     | Ensure ticket is generated and booking confirmation is sent successfully. |
| Booking History           | Medium   | Verify users can view previous bookings accurately.                       |
| Ticket Cancellation       | High     | Validate ticket cancellation and refund initiation process.               |

## 6. Features NOT to be Tested

- ☐ Help Contents and user manuals will not be tested.
- ☐ Installation and presentation will not be tested.
- ☐ Support of the other architectures also will not be tested.
- ☐ Third-party payment gateway internal logic
- ☐ Legacy modules not impacted by current release
- ☐ Experimental features

## 7. Test Environment

|               |                                                                  |
|---------------|------------------------------------------------------------------|
| Device name   | Neerajsingh                                                      |
| Processor     | 12th Gen Intel(R) Core(TM) i7-12650H (2.30 GHz)                  |
| Installed RAM | 16.0 GB (15.7 GB usable)                                         |
| Graphics card | NVIDIA GeForce RTX 2050 (4 GB)<br>Intel(R) UHD Graphics (128 MB) |
| Storage       | 408 GB of 954 GB used                                            |
| Device ID     | FCCB66CB-52A1-4FB9-B114-8F127CB4FDB1                             |
| Product ID    | 00342-42639-73928-AAOEM                                          |
| System type   | 64-bit operating system, x64-based processor                     |
| Pen and touch | No pen or touch input is available for this display              |

|              |                                                  |
|--------------|--------------------------------------------------|
| Edition      | Windows 11 Home Single Language                  |
| Version      | 25H2                                             |
| Installed on | 12/28/2024                                       |
| OS build     | 26200.8655                                       |
| Experience   | Windows Feature Experience Pack 1000.26100.315.0 |

## 8. Test Approach / Test Strategy

Describes **how testing will be performed**.

The test strategy for Abhibus1.0 will include manual testing with automated testing(**Selenium With Java**) where time/need permits. Automated testing will be used to test the basic Interface objects keyboard and mouse navigation or any redundant tasks best translated to automation. Automated testing will be limited to a Win-64 platform because of Automation tool limitations.

- Sanity test will include an very short battery of tests to ensure the Naukri1.0 runs/launches and can connect to the back end database(**MySQL /SQL Server 2025**). Test execution will happen as individual component testing. These tests will be fully automated.
- **Acceptance tests** will include a short battery of tests that will only touch major features to ensure Naukri1.0 will operate smoothly at a basic level. These tests will be executed on **Windows 11 Home Single Language**. The goal will be to automate all of these tests.
- Full Functional tests will include a **comprehensive test** of all features listed in this document. These tests will be limited to the Windows 11 pro. These test will include automation with time allowing.

### 8.1 Types of Testing

- Smoke Testing
- Sanity Testing
- Functional Testing
- Integration Testing

- System Testing
- Regression Testing

## 8.2 Test Levels

- Unit Testing (by developers)
- Integration Testing
- System Testing
- Acceptance Testing

## 8.3 Test Techniques

- Black Box Testing
- Boundary Value Analysis
- Equivalence Partitioning
- Error Guessing **Functionality Testing**

## Usability Testing

The usability testing will be accomplished by verifying the information in each window are accurate. Menus, icons and toolbar functionality will be tested as applicable to the navigation and results panes. Multi Window Overlapping will be tested because product supports opening of multiple documents.

## Robustness/Reliability Testing

Test the GUI for correct keyboard and mouse navigation, windows, menus, buttons, etc. These tests will include Keyboard only navigation of Abhibus1.0, Mouse only navigation. Correctness and existence of warning/error dialog boxes. The correct/expected functionality of buttons, icons and menus.

## Stress Testing

Not applicable

## 9. Entry and Exit Criteria

### 9.1 Entry Criteria

Conditions to start testing:

- Requirements approved
- Test environment ready
- Test data available
- Build deployed

### 9.2 Exit Criteria

Conditions to stop testing:

- All planned test cases executed
- Critical and high defects closed
- Test summary report prepared

## 10. Test Deliverables

|                      |                                                                                                         |
|----------------------|---------------------------------------------------------------------------------------------------------|
| Test plan            | <b>1.0_AbhibusAcc.doc</b>                                                                               |
| Test Specification   | <b>1.0_AbhibusAcc_tspect.doc</b>                                                                        |
| Test Automation Plan | TBD()                                                                                                   |
| Test Checklist       | TBD                                                                                                     |
| Test Logs            | TBD                                                                                                     |
| Test tools           | Selenium 4.38, Postman, Rest Assured, Jmeter, Jenkins, Git and Git Hub and Appium and MySql Server 2025 |

## 11. Testing Tasks & Resource Needs

- Use of MySql Server database.
- Write Test Specification.
- Write Test Automation plan.

- Write Test Checklist.
- Setup workspace.
- Develop Automation script.

□ Minimum requirements for platforms:

## 12. Schedule

| Total Test Cycle     |               | 1                                   | 1     | 1     |                     |

### 13. Risks and Assumptions

#### Risks:

- **Environment Instability:** Delays in setting up the test environment could impact the schedule- VM is not working port no.-5103
- **Resource Availability:** Limited availability of testers could delay test execution.
- **Late Requirement Changes:** Changes in requirements during the testing phase could lead to additional testing efforts.
- **Contingencies:**
  - **Backup Resources:** Have backup resources ready to join the testing effort if required.
  - **Flexible Schedule:** Allocate buffer time in the schedule to accommodate unexpected delays.
  - **Regular Communication:** Hold daily stand-up meetings to quickly address any issues that arise

### 14. Approvals \Sign of
